**Course Description:** In most jurisdictions, traffic crashes account for more lives lost, more injuries and more property damage than all criminal activity combined. To effectively implement crash prevention programs and improve quality of life, law enforcement agencies need to know the who, what, where, when and why of crash occurrence.

The moments immediately following a traffic crash are crucial, and only a well-trained crash investigator knows how to identify and collect the necessary information at the crash scene and to begin the interpretation of that evidence.

Crash investigators must work quickly and confidently to preserve significant physical results before the crash scene is altered or evidence disappears. They must anticipate what information will be needed for enforcing traffic laws, planning crash prevention programs and possible case litigation. In addition, they must properly document the at-scene information and evidence because once the scene is cleared, the evidence might be impossible to recover.

Crash Investigation 1, based on J. Stannard Baker's world-renowned text, Traffic Crash Investigation, is an in-depth study of the skills needed to systematically investigate a traffic crash. Techniques for recognizing and properly recording roadway and vehicle crash evidence are thoroughly presented. Students learn to take measurements and photographs of the crash scene and to create sketches and after-crash diagrams. Crash Investigation 1 also addresses how the collected data are used to reconstruct crashes. Finally, the use of electronic devices to collect and record at-scene data is also introduced.

**Course Topics:**

- Preparation for traffic crash investigation
- Information from and about people
- Information from vehicles
- Information from roads
- Measuring and mapping the crash scene
- Photographing the crash scene and damaged vehicles

Continued on next page:

- For this updated program, students will develop a new case study. Photographs and exhibits have been updated, and classroom instruction now includes how the latest generation of vehicle electronics - including data recorders, traction and stability controls, multiple airbags, etc. - affect both the crash and the crash investigation.

**Course Materials:** All students need to bring a laptop computer or other device with a USB port to the class. Student reference materials will be distributed in USB flash drives (files will accept electronic comments and highlighting and can be saved).

**In all cases, please bring the following additional items to class:**

- Comfortable outdoor clothing (likely to get dirty) for Week 2 outdoor projects.
- Simple calculator with square root key

- Staedtler Geometry Compass
- Laptop computer (or other device) with USB port(s) and Adobe Reader installed.
- Students may use calculators and electronic communication devices in class; however, possession/use of electronic communication devices during closed-book quizzes and exams is prohibited.

**Course Outcomes:** Officers/investigators who successfully complete Crash Investigation 1 significantly improve their ability to handle all aspects of the majority of traffic crash investigations occurring within their jurisdictions.

Participants who successfully complete Crash Investigation 1 or its equivalent are eligible to enroll in Tri-River's and NUCPS's next crash investigation course, Crash Investigation 2.

# The Threat of Hate Groups in the United States and Their Implications for Law Enforcement

Frankfort Police Department

20602 Lincoln-Way Lane, Frankfort, IL. 60423

Wednesday; March 13, 2024

8:00 am till 4:00 pm

This course complies with the guidelines of the following mandate(s):

- Civil Rights 0.5 Hour
- Const. Use of LE Authority 0.5 Hour
- Crisis Intervention 0.5 Hour
- Human Rights 2.0 Hours
- Procedural Justice 0.5 Hour

**Course Description:** It is crucial that U.S. law enforcement is made aware of the dynamics of the threat of hate groups/crimes and craft solutions to combat it.

This eight-hour, in-service program addresses this timely topic as noted below.

Hate crime laws protect people who are targeted based on their actual or perceived characteristics like race, color, religion, gender, sexual orientation or physical or mental disability. Lone wolves and cabals inspired by hate-based ideology, as well as those formally linked to a hate group, perpetrate such crimes. According to the FBI, hate crime incidents increased by 11.6% from 2020-2021. Also, nationally, we have witnessed lone-wolf, mass casualty hate crimes with increasing frequency such as in: Jacksonville (2023, 3 killed), Buffalo (2022, 9 killed), El Paso (2019, 23 killed), Pittsburgh (2018, 11 killed), and Orlando (2016, 49 killed), all fueled by hatred of Blacks, Hispanics, Jews, and LGBTQ communities, respectively. During the Covid-19 pandemic, there was a substantial increase in anti-Asian hate crimes.

Hate groups targeting the full spectrum of American society remains prominent, with actions some of which are constitutionally protected to others that include deadly plots. These harmful manifestations of extremism have many root causes but are aggravated presently by political, social, and economic factors as well as social media.

The first portion of the program will discuss: radicalization, recruitment, and mobilization of group members; ideologies and activities of hate groups and their concomitant crimes; indicators of hate crimes and signs of hate crime perpetrators; and selected hate crimes and lessons learned therein; among other themes. The session's second portion will address law enforcement responses to this menace, such as: underscoring the importance of responding to and investigating hate crimes; facilitating outreach to targeted communities; encouraging hate crime reporting through community outreach; preventing the frequency/severity of attacks; officer safety issues; planning for and responding to protests/counter-protests; and other topics.

# ~~Sovereign Citizen Awareness for Law Enforcement~~

~~Frankfort Police Department~~

~~20602 Lincoln Way Lane, Frankfort, IL. 60423~~

~~Thursday, March 14, 2024~~

~~8:00 am till 4:00 pm~~

This course complies with the guidelines of the following mandate(s):

- Civil Rights 0.5 Hour
- Const. Use of LE Authority 0.5 Hour
- Procedural Justice 0.5 Hour
- De-escalation Techniques 0.5 Hour
- Officer safety techniques 1.0 Hour

**Course Description:** It is crucial that U.S. law enforcement is made aware of the dynamics of the threat of sovereign citizens and craft solutions to combat this growing homeland security challenge. The eight-hour, in-service program, Sovereign Citizen Awareness and Responses, addresses this timely topic as noted below.

According to various estimates, there are several hundred thousand sovereign citizen adherents in the United States, a type of anti-government extremists. These individuals believe that the U.S. federal government is illegitimate and that they are "freemen," outside the control of government. Sovereign citizens eschew all affiliations and interactions with the federal government, while giving primacy to the power of the county law enforcement official, the sheriff. In recent years, some sovereign citizens have embraced QAnon ideals and vice versa, and thereby further fueling extremism.

In the past several years, sovereign citizens have increasingly been involved in criminal activities nationwide, including fraud as well as threats and violence against government officials, particularly law enforcement. Murders of police officers by sovereign citizens are indicative of the types of threats law enforcement faces from sovereign citizens for more than three decades, which arose with the sovereign citizen progenitor, the Posse Comitatus group. Sovereign citizens are increasingly non-compliant during interactions with police, and violently so.

There are disparate indicators that law enforcement should be aware of in relation to sovereign citizens. Knowledge of sovereign citizen indicators, symbols, and tactics can aid law enforcement's efficacy in dealing with them and enhancing officer safety while doing so. Leveraging traditional policing activities against this threat and others specifically focused on this type of extremism will be addressed as well.

# ~~Advanced Roadside Impaired Driving Enforcement (A.R.I.D.E.)~~

~~Crest Hill Police Department~~

~~20590 City Center Boulevard, Crest Hill, IL. 60403~~

~~Monday & Tuesday, March 18-19, 2024~~

~~8:00 am till 4:00 pm~~

This course complies with the guidelines of the following mandate(s):

- Civil Rights 10.0 Hours (3.0 Hours Scenario-Based)
- Const. Use of L.E. Authority 2.0 Hours
- Legal Updates 4.0 Hours
- Advanced Roadside Impaired Driving Enforcement (ARIDE) 16.0 Hours (3.0 Hours Scenario-Based)

**Course Description:** The Advanced Roadside Impaired Driving Enforcement (ARIDE) program was developed by the National Highway Traffic Safety Administration (NHTSA) with input from the International Association of Chiefs of Police (IACP) Technical Advisory Panel (TAP) and the Virginia Association of Chiefs of Police. ARIDE was created to address the gap in training between the Standardized Field Sobriety Testing (SFST) and the Drug Evaluation and Classification (DEC) Program.

This course will offer additional information to law enforcement officers on detecting impairment caused by more than just alcohol. Often law enforcement officers that have not received advanced or in-service training regarding drug impairment tend to not be able to identify these characteristics; therefore, they will release an impaired driver. Once an officer completes the training he/she will be more proficient with the 3 battery of tests (HGN, WAT, OLS), as well as a broader knowledge of drug impairment indicators. The law enforcement officer will also be more familiar with the DRE program and its function. This will facilitate better communication and transfer of critical roadside indicators of impairment to the evaluating DRE officer for a more complete and accurate assessment of the impairment. ARIDE is a 16-hour training course taught by DRE instructors or SFST instructors who are also DREs. The training will be conducted under the control and approval of the DEC Program state coordinator. This course encompasses information and techniques for addressing the drug and alcohol impaired driving problem.

The following topics are discussed and/or delivered in detail throughout the entire curriculum:

- Update of Standardized Field Sobriety Testing Battery
- How drug impaired driving affects our community
- SFST Proficiency Examination
- Drugs in the human body and the impairing effects they may have
- Seven categories of drugs identified by the DEC Program
- Additional sobriety tests that will provide an expanded knowledge of detection to law enforcement
- Provide an expanded knowledge of prosecuting drug impaired drivers to prosecutors and courts

Much of the classroom training is devoted to hands-on practice.

**Instructors:** Dave Christiansen (lead instructor), of the Dekalb County Sheriff's Office, is a Drug Recognition Expert Instructor as well as a Standardized Field Sobriety Testing Instructor and crash investigator. Ari Briskman (co-instructor), of the Lake County Sheriff's Office, is a Drug Recognition Expert Instructor as well as a Standardized Field Sobriety Testing Instructor and crash reconstructionist.
